

BINTANG CATO JEREMIA L TOBING

Full-Stack Developer & AI Integration Specialist

+62 812 6284 5980 | hello@bintangtobing.com | www.bintangtobing.com | linkedin.com/in/bintangtobing

PROFESSIONAL SUMMARY

Full-Stack Developer with 8+ years building and shipping production systems across fintech, ERP, manufacturing, and government sectors. Strong in Laravel and React/Next.js. Delivered platforms now used by 500+ businesses. Recent work includes AI integration using Anthropic Claude and OpenAI APIs, a self-built Claude-compatible MCP server, a multi-tenant MarTech intelligence platform with 26 modules, and a real-time analytics pipeline benchmarked at 1.55B events/day. Comfortable owning projects end-to-end from code to production operations, leading teams, and writing technical documentation.

TECHNICAL SKILLS

Backend Laravel (PHP), Node.js, Python, REST API, GraphQL, Filament, Livewire

Frontend React.js, Next.js, Vue.js, TypeScript, JavaScript, TailwindCSS, shadcn/ui, Alpine.js, HTML5, CSS3

Mobile React Native, Expo, Flutter

Database MySQL, PostgreSQL, MongoDB, SQL Server

DevOps Git, GitHub, Docker, CI/CD, Nginx, PM2, Let's Encrypt, fail2ban, Redis, Horizon, Server Administration

Real-Time & AI Pusher Channels, Jitsi Meet (self-hosted), Anthropic Claude API, OpenAI GPT-4o, MCP, n8n, Prompt Engineering

Tools Figma, Photoshop, Chrome Extension API, WordPress, Vite

PROFESSIONAL EXPERIENCE

Marketing and Technology Manager Feb 2025 - May 2026

Bitunix Fintech LLC, United Arab Emirates

- Built and shipped the Bitunix MarTech Dashboard: a full-stack internal analytics platform (Laravel 13, Next.js 16, PostgreSQL, Redis, BigQuery) unifying Google Search Console, GA4, and the Bitunix Partner Portal into a 9-stage conversion funnel.
- Diagnosed and fixed a silent GA4 Data API pagination bug. Campaign visibility expanded from 293 to 1,791 unique source/medium/campaign combinations. Recovered 56% of undercounted affiliate signups by fixing NULL-handling bugs in the Partner API.
- Built a GPT-4o AI report generator in EN/ID/ZH with PDF/DOCX export, eliminating 8+ hours/week of manual reporting.
- Integrated Anthropic Claude and OpenAI APIs into 3 internal automation workflows. Reduced manual content production effort by 75%.
- Architected a MarTech stack integrating CRM, GA4, Meta, TikTok, and Twitter Ads with automated UTM tracking and multi-channel attribution.

Sole Developer - PMHelper (Laravel + Expo PM Platform) 2026

github.com/bintangtobing/pm-helper - pm.cirrus-hub.net

- Forked an abandoned Laravel 9 / Filament v2 / Livewire 2 codebase and turned it into a production-grade PM tool: upgraded PHP 8.2 to 8.3, fixed N+1 hotspots, added authorization on every policy, and translated 53 broken locale keys.
- Built a REST API of 37 endpoints with Laravel Sanctum, custom API Resources, and a dedicated mobile broadcasting auth controller, paired with a separate Expo mobile app (React Native, TypeScript) consuming 6 modules.
- Implemented real-time collaboration: Pusher Channels for Kanban moves with bi-directional web-to-mobile sync, a 1-on-1 Messenger (image/video/file paste-drop, link previews, read receipts), and Jitsi Meet self-hosted on a separate VPS with IFrame API embedding and live transcript to GPT-4o auto-summary on meeting end.
- Designed and shipped an MCP server exposing 14 tools (tickets, discussions, daily reports, lookups) over Sanctum-scoped mcp:* tokens, compatible with Claude Desktop and Claude Code, plus a self-service admin MCP-token page.
- Wrote a global Command-K palette spanning navigation, tickets, projects, people, and goals with keyboard navigation and deep links; built a sidebar accordion, custom theme toggle, image compression on upload, and dark-mode overrides across Gantt, Kanban, and Tailwind.
- Operated production solo on a Hostinger VPS: Nginx, Let's Encrypt, MySQL, PHP-FPM tuning, PM2 queue workers, Laravel scheduler via crontab, fail2ban, and a one-command deploy. Executed a full domain migration including DB rename, SMTP cutover, and Jitsi-domain swap with zero data loss.

- Integrated an AI chatbot grounded in a project knowledge base and PDF docs (RAG-style context), per-user webhooks, a Gmail SMTP transactional pipeline, customer-feedback public forms (PDF/DOCX attachments up to 25MB), and a versioned changelog page.

Stack: Laravel 9, PHP 8.3, Filament v2, Livewire 2, Alpine.js, Tailwind 3, Vite 3, MySQL 8, Pusher, Jitsi Meet, Spatie Permissions/Media Library/Settings, Sanctum, MCP, Expo / React Native, TypeScript, Nginx, PM2, Hostinger VPS.

Founder & Sole Engineer - KlindrOS (Marketing Intelligence Platform) Feb 2025 - Present

Personal product, in active development for commercial release

- Architected and shipped KlindrOS, a multi-tenant marketing intelligence platform from scratch. Built 26 product modules including multi-touch attribution, ROI engine, CDP, AppsFlyer mobile attribution, and a GPT-4o AI insights chatbot.
- Stack: Laravel 11, Next.js 16, PostgreSQL, React Native (Expo). Delivered web, iOS, and Android apps with a shared backend and multi-tenant data isolation.
- Engineered a real-time analytics pipeline benchmarked at 1.55B events/day on a single VPS with self-healing fault recovery and circuit breakers.
- Authored a 294-endpoint OpenAPI 3.x specification, a bilingual (EN/ID) 14-module user guide, and a tenant onboarding QA suite. Anchored Viu (regional OTT) as launch client.

Project Manager Jun 2024 - Apr 2025

Parla Consultancy Sdn Bhd, Kuala Lumpur

- Built full-stack web applications in Next.js and TailwindCSS. Managed server operations, maintaining 99.9% uptime.
- Led an API integration project connecting Duhani Capital's back-office with Syntellicore CRM. Delivered 2 weeks ahead of schedule.
- Converted 150+ leads through CRM-aligned campaigns with a 35% improvement in conversion rate.

Software Engineer Jun 2024 - Nov 2024

PT Dinamik Mobile (iPay88), Jakarta

- Delivered web-based payment application features using React.js, Node.js, and Laravel across the full project lifecycle.
- Resolved 40+ complex payment flow issues. Optimized site performance by 30%.
- Produced comprehensive technical documentation for onboarding 3 new engineers.

Product Owner & Mobile Developer Mar 2021 - Nov 2023

PT Boxity Central Indonesia, Jakarta

- Led a 6-person team to expand an ERP platform from 3 to 7 core modules using Laravel, React Native, and Node.js. System serves 500+ MSMEs.
- Built 4 React Native mobile apps: warehouse tracking, inter-warehouse transactions, employee attendance, and live financial reporting.
- Established CI/CD pipelines with GitHub Actions. Coordinated UAT and penetration testing for each release.
- Mentored 2 junior developers who advanced to mid-level within 12 months.

Full-Stack Developer & Project Manager Sep 2018 - Oct 2023

PT Benua Solusi Teknologi, Jakarta

- Delivered web applications for general insurance data processing, warehouse tracking, and financial management systems.
- Managed 5+ concurrent client projects. Resolved 20+ system vulnerabilities across client servers.

Web Developer (Remote) Nov 2020 - Feb 2021

Digital Envision Pty. Ltd, Sydney, Australia

- Built a water chemical management application for the Australian Government in collaboration with CRC Care using React.js, Node.js, and Laravel.

KEY ACHIEVEMENTS

- **PMHelper:** Production PM platform built and operated solo: 40+ releases in ~2 months, REST API (37 endpoints), Expo mobile app, real-time Kanban + messenger, self-hosted Jitsi with AI meeting summaries, and a Claude-compatible MCP server (14 tools). Full solo production operations including a zero-data-loss domain migration.
- **KlindrOS:** Multi-tenant MarTech platform with 26 modules, a 1.55B events/day pipeline, a 294-endpoint OpenAPI spec, and native iOS/Android apps. Anchored Viu as launch client.
- **Bitunix MarTech Dashboard:** Fixed a GA4 pagination bug surfacing 1,791 campaigns instead of 293. Recovered 56% of undercounted affiliate signups. Eliminated 8+ hours/week of manual reporting with GPT-4o automation.

- **Cirrus Crypto Platform:** End-to-end signal broadcasting system (OpenAI, CoinGecko, Telegram API, Redis). Zero manual intervention. Multi-language auto-translation across 5+ languages.
- **AI Marketing Extension:** Chrome extension with Anthropic Claude integration. 18% CTR increase for Duhani Capital. 36% traffic growth for Bitunix.
- **ERP Scaling:** Boxity ERP grown from 3 to 7 modules serving 500+ MSMEs. 4 companion mobile apps shipped.
- **PT DHK Manufacturing:** Warehouse management system delivered. 35.4% efficiency improvement in goods-receiving.
- **YouTube-to-Twitter Automation:** n8n pipeline (YouTube API, Supa Data, Anthropic Claude, OpenAI, Twitter API). 90% reduction in manual content effort.

AWARDS & RECOGNITION

- Top 250 Global Startups, Slingshot 2022 Deep Tech Startup Competition, Singapore
- Top 100 Global Startups, Huawei Spark Ignite 2022 Program
- Top 20 Nominee, Founder+ Incubator Program
- Second Place Winner, Startup Exhibition Medan 2023
- Top 32 Potential Startups, Hatch! Gerakan 1000 Startup Digital Nasional, Kemenkominfo

CERTIFICATIONS

- IBM IT Project Manager Specialization, IBM & SkillUp EdTech (2025)
- Google Project Management Professional Certificate, Google (2024)
- ASEAN Data Science Explorers, SAP Analytics Cloud & SAP Build Apps, ASEAN Foundation (2024)
- Front-End Web Development Quantum Degree, Next Academy, Kuala Lumpur (2019)
