

BINTANG CATO JEREMIA L TOBING

Technical Product Manager | Fintech & ERP Systems

+62 812 6284 5980 | hello@bintangtobing.com | www.bintangtobing.com | linkedin.com/in/bintangtobing

PROFESSIONAL SUMMARY

Technical Product Manager with 8+ years building and shipping software products across fintech, ERP, and marketing technology. Bridges business requirements and engineering execution, and owns delivery end-to-end from requirements to live operations. Delivered systems now used by 500+ businesses. Track record includes 18% CTR improvement, 35.4% efficiency gain in manufacturing, and 90% reduction in manual workflows through AI integration. Experienced in technical documentation, ERD and system design, requirements analysis, stakeholder alignment, QA coordination, and operating Claude-compatible MCP integrations in production.

CORE COMPETENCIES

- Product Ownership & End-to-End Delivery
- Technical Requirements Analysis & PRD Authoring
- ERD, UML, Flowchart & API Documentation
- RBAC & Workflow Design (roles, permissions, status pipelines)
- Agile/Scrum, Sprint Planning & QA Coordination
- AI Integration (Anthropic Claude, OpenAI, MCP)
- Trading & Fintech Systems (Crypto, Payment)
- Full-Stack Development (Laravel, React, Node.js)

PROFESSIONAL EXPERIENCE

Marketing and Technology Manager Feb 2025 - May 2026

Bitunix Fintech LLC, United Arab Emirates

- Defined requirements and coordinated implementation of a MarTech stack integrating CRM, GA4, Meta, TikTok, and Twitter Ads. Documented data flows, UTM structures, and attribution logic for the engineering team.
- Built real-time analytics dashboards. Translated business KPIs into technical specs for developers, then validated output through structured UAT.
- Integrated Anthropic Claude and OpenAI APIs into 3 internal workflows. Wrote technical documentation covering API behavior, prompt logic, and error handling.
- Led incident management coordination between customer support and engineering. Reduced platform downtime by 60% through structured escalation and resolution tracking.

Product Owner & Lead Engineer - PMHelper 2026

Project Management Platform (solo product owner & lead engineer) - pm.cirrus-hub.net

- Owned end-to-end product for an internal PM platform replacing an abandoned open-source tool, shipping 40+ versioned releases in ~2 months across web, mobile, and AI surfaces.
- Designed an RBAC model with 6 production roles (Super Admin, PM, Developer, QA, DevOps, Stakeholder) mapped to 69 granular permissions, and a responsibility-based ticket-status workflow of 15 statuses across a Dev → QA → Business pipeline.
- Defined the ticketing schema: 9 ticket types, 4-tier priority, QA checklists, bug-report templates, time-logging via /spend, and quick-edit actions, driving consistent intake across engineering, design, and QA.
- Shipped an OKR/KPI module across 4 sprints with objective hierarchy, auto-calculated key results, self/supervisor review flow, weekly-report integration, and dashboard widgets, connecting individual performance to company goals.
- Launched a Customer Feedback product line (public form, Filament admin, mobile API, dashboard widget, chatbot integration) with file attachments and token-gated public URLs.
- Scoped and shipped Daily Reports, Weekly Reports (auto-summary, PDF view, acknowledge workflow), Discussions, Activity Log tree view, and an org chart, all instrumented through a unified activity feed.
- Ran a real third-party rollout playbook: cross-team coordination with Designer, QA, and Stakeholder, change management via in-app changelog, weekly digest emails, and notification policy governance.

Project Manager Jun 2024 - Apr 2025

Parla Consultancy Sdn Bhd, Kuala Lumpur

- Managed an API integration project connecting Duhani Capital's back-office system with Syntellicore CRM (Cyprus). Produced technical documentation covering data mapping, endpoint specs, and test cases.

- Translated business requirements into functional specs for full-stack web applications built in Next.js and TailwindCSS. Delivered the project 2 weeks ahead of schedule.
- Maintained 99.9% server uptime through proactive monitoring and self-managed maintenance. Coordinated issue resolution across cross-border teams in Malaysia, Cyprus, and Indonesia.
- Converted 150+ leads through CRM-aligned campaign execution with documented workflows for the sales team.

Software Engineer Jun 2024 - Nov 2024

PT Dinamik Mobile (iPay88), Jakarta

- Delivered web-based payment application features across the full project lifecycle. Conducted detailed requirements analysis and translated specifications into technical designs.
- Resolved 40+ complex payment flow issues working closely with QA engineers and product managers. Documented each fix with root cause analysis and regression test notes.
- Optimized site performance by 30% using Laravel and React.js. Maintained comprehensive onboarding documentation for new engineers.

Product Owner Mar 2021 - Nov 2023

PT Boxity Central Indonesia, Jakarta

- Led a 6-person development team to expand an ERP platform from 3 to 7 core modules, including warehouse management, financial reporting, attendance tracking, and inter-warehouse transactions. The platform served 500+ MSMEs across Indonesia.
- Authored product requirements documents, user stories, ERDs, and data flow diagrams for each new module. Facilitated sprint planning, daily standups, and retrospectives with the engineering team.
- Established CI/CD pipelines using GitHub Actions. Coordinated UAT and penetration testing to maintain QA standards before each release.
- Built and delivered 4 React Native mobile applications: warehouse tracking, inter-warehouse transactions, employee attendance, and live financial reporting.
- Mentored 2 junior developers. Both advanced to mid-level roles within 12 months.

Full-Stack Developer & Project Manager Sep 2018 - Oct 2023

PT Benua Solusi Teknologi, Jakarta

- Managed end-to-end delivery of client web applications. Produced technical requirements, system documentation, and security audit reports.
- Developed web applications for general insurance data processing and warehouse financial tracking. Improved data accessibility by 45%.
- Handled 5+ concurrent projects with full self-management. Identified and resolved 20+ system vulnerabilities across client servers.

Web Developer (Remote) Nov 2020 - Feb 2021

Digital Envision Pty. Ltd, Sydney, Australia

- Developed a water chemical management application for the Australian Government in collaboration with CRC Care. Built front-end and back-end components using React.js, Node.js, and Laravel.

KEY ACHIEVEMENTS

- **KlindrOS / QineticOS:** Architected and shipped a multi-tenant marketing intelligence platform end-to-end. Built 26 product modules including multi-touch attribution, ROI engine, CDP, AppsFlyer mobile attribution, and GPT-4o AI insights. Stack: Laravel 11, Next.js 16, PostgreSQL, React Native. Real-time pipeline benchmarked at 1.55B events/day on a single VPS. Authored a 294-endpoint OpenAPI 3.x spec and a 14-module bilingual (EN/ID) user guide. Anchored Viu (regional OTT) as launch client.
- **PMHelper MCP Server:** Designed and shipped an MCP server exposing 14 tools (tickets, discussions, daily reports, lookups) over Sanctum-scoped tokens, compatible with Claude Desktop and Claude Code, with a self-service admin token page.
- **Bitunix MarTech Dashboard:** Designed an internal marketing attribution platform unifying Google Search Console, GA4 (BigQuery), and the Bitunix Partner Portal into a 9-stage conversion funnel. Diagnosed and fixed a silent GA4 pagination bug that expanded campaign visibility from 293 to 1,791 unique source/medium/campaign combinations. Built a GPT-4o report generator in EN/ID/ZH, eliminating 8+ hours/week of manual reporting.
- **Cirrus Crypto Platform:** Designed and built an end-to-end crypto signal broadcasting system integrating OpenAI, CoinGecko, Telegram API, and Redis. Signals broadcast to 10+ Telegram channels with zero manual intervention. Automated multi-language content translation across 5+ languages.
- **AI-Powered Marketing Extension:** Developed a Chrome extension integrating Anthropic Claude for campaign management and UTM automation. Delivered 18% CTR increase for Duhani Capital and 36% traffic growth for Bitunix.

- **ERP Platform Scaling:** Grew Boxity ERP from 3 to 7 modules. System serves 500+ MSMEs. Built accompanying mobile apps for warehouse, finance, and HR use cases.
- **PT DHK Manufacturing:** Built a warehouse and production management system. Achieved 35.4% efficiency improvement in goods-receiving processes.

TECHNICAL SKILLS

Backend Laravel (PHP), Node.js, Python, REST API, GraphQL

Frontend React.js, Next.js, Vue.js, TypeScript, JavaScript, TailwindCSS, shadcn/ui

Mobile React Native, Expo, Flutter

Database MySQL, PostgreSQL, MongoDB, SQL Server

DevOps Git, GitHub, Docker, CI/CD, Nginx, PM2, Server Administration

AI & Automation Anthropic Claude API, OpenAI API, MCP, n8n, Prompt Engineering, AI Pipeline Architecture

PM & Docs Agile/Scrum, RBAC Design, Notion, Draw.io, Whimsical, Figma, Sprint Planning, UAT, Stakeholder Communication

Analytics Google Analytics 4, BigQuery, SAP Analytics Cloud, A/B Testing, CRO

AWARDS & RECOGNITION

- Top 250 Global Startups, Slingshot 2022 Deep Tech Startup Competition, Singapore
- Top 100 Global Startups, Huawei Spark Ignite 2022 Program
- Top 20 Nominee, Founder+ Incubator Program
- Second Place Winner, Startup Exhibition Medan 2023
- Top 32 Potential Startups, Hatch! Gerakan 1000 Startup Digital Nasional, Kemenkominfo

CERTIFICATIONS

- IBM IT Project Manager Specialization, IBM & SkillUp EdTech (2025)
- Google Project Management Professional Certificate, Google (2024)
- ASEAN Data Science Explorers, SAP Analytics Cloud & SAP Build Apps, ASEAN Foundation (2024)
- Front-End Web Development Quantum Degree, Next Academy, Kuala Lumpur (2019)

EDUCATION

SMK Negeri 1 Percut Sei Tuan, Indonesia

Rekayasa Perangkat Lunak (Software Engineering)
